What was my site aiming to do?

The main purpose of my website is to inform visitors about my restaurants and give a brief overview of the variety of cuisines we offer on our food menu. My restaurant's name is The Assemble, and so is my website.

By offering culinary training classes, my website also aims to deliver the depth of knowledge of cooking skills. Also, the site aims is to satisfied the hungry of every type of visitor by providing them the choices of different type of cuisine according to their needs and want. I'm trying to make a modern, straightforward, and user-friendly website..

Target Audience

The target audiences of my site are just everyone who takes interested to taste different type of cuisine according to their needs. Also, to those people who want to become chef by providing them culinary training classes.

Objective

1. Make the site as approachable as possible.
2. Maintain the user's attention by keeping your information simple
3. To evaluate the usability and user experience of the website, including the navigation, layout, and functionality
4. To review the website's content, including Our menu, About us, Our service, suggest ways to improve the presentation and accuracy of this information.

Design Notes

Overall Style

The overall goal of the design was to create something that is simple, attractive to look at, simple to follow. I use a straightforward, brief writing style that is simple to read and comprehend. Aim to make the report understandable to a broad audience by avoiding the use of jargon or too complex language. In this regard, I've struck an excellent balance. Another way I was able to reduce clutter was by using an Android burger menu to show the navigation bar; this enhanced the appearance and usefulness of my website.

Choice of fonts and colour:

Again, my font of choice, and colour palette of choice were both chosen with the intention of creating a simple and elegant. I have choose only three fonts in my website Arial, Annie Use Your Telescope, and Homemade Apple, which makes my website formal, attractive and readability

Regarding the colours I utilized, I mainly used orange, yellow, black, white, blue, Gray and red and a variety of that's makes my website attractive with clean look.
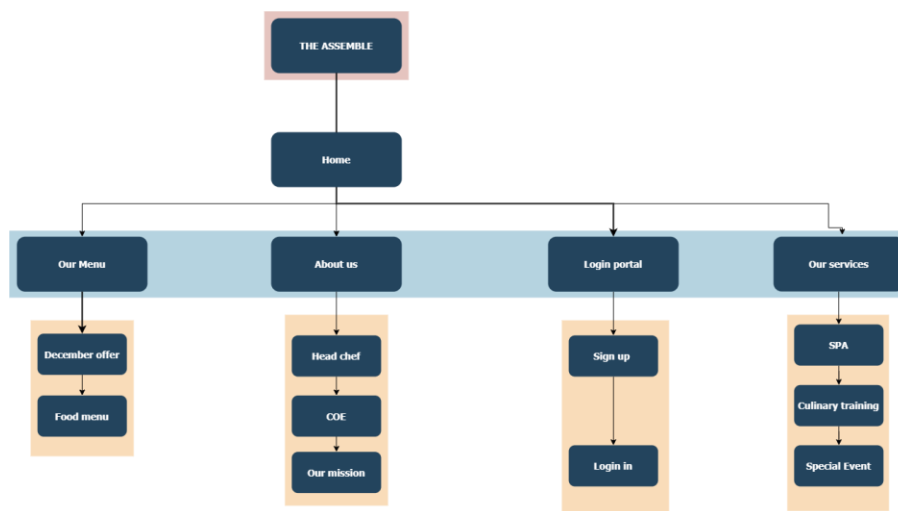

Colours Used

COLOURS	CODE
Orange Yellow Black White Blue Dark white Red	DB621E E3E650 000000 FFFFFF 0F55A8 D9D9D9 FD0000

Interactions

Firstly, Users have to search theassemble01.com in their search engine to open the restaurant website. User can see different link in navigation bar from where they can able to go different pages of the website. In the body part user see slogans, review from our consumer and Find delicious deals button from where they can easily go to menu page. At the footer part in Left hand side, user see the contact information of the restaurant. In the Right hand site, User can see different link of page in footer bar.On the other pages the header and footer areas are same.
